Hi Tarryn,

Here is a statement from Board President Dr. Sharon Whitehurst-Payne:

"I appreciate you reaching out to me on this issue. I have personally discussed this with our superintendent and facilities staff, and understand that Clark Middle experienced heating issues in the 200 building on January 22, followed by the 300 building on January 31.

While district staff were able to immediately restore heat to the 300 building, the 200 building required troubleshooting and wasn't fully resolved until a few weeks later. While the problem was investigated, the principal took immediate action and brought in portable heaters and offered to relocate all impacted classrooms.

I believe there is always room for improvement so I have asked the superintendent to provide a full incident report to the board by our next meeting."

Best regards,

Samer Naji

Facilities Communication Supervisor

San Diego Unified School District

O: (619) 725-7747
